Subject: Rep. Rush

Ayn, Jim -

There will not be a pre-brief today with Bob S. The slide presentation that you (Ayn) provided should be fine for covering most of their questions (history of the investigation and reason for the extension of the comment period). I expect we will not share the presentation with the staff, but rather just talk from it.  
Fred

Here's the language (I bolded the sentence that was revised):

EPA is announcing an extension to the public comment period for the external review of the draft research report titled, "Investigation of Ground Water Contamination near Pavillion, Wyoming."

The draft research report was prepared by the National Risk Management Research Laboratory, within the EPA Office of Research and Development, and EPA Region 8. This draft research report is not final as described in EPA's Information Quality Guidelines, and does not represent and should not be construed to represent Agency policy or views. During the extended public comment period, EPA will post additional technical information on the web. This will include additional details on how the study was conducted, recent information from Phase V sampling, and responses to issues commonly raised by stakeholders. EPA also intends to meet with key

stakeholders during this period. **The Agency will continue to review the status of its work on Pavillion in light of the additional information posted in the record and public comments that are received, and will examine a number of options going forward.**

Date: The public comment period began December 14, 2011, and ends September 30, 2013. Comments should be submitted to the docket or received in writing by EPA by September 30, 2013.
